Length Word Problems Based on Subtraction

1. Jony has a scale of 3 meters length. Jeny has another scale of 4 meters length. Calculate how much length Jeny has more than Jony.

Ans: $4 \text{ meters} - 3 \text{ meters} = 1 \text{ meter}$

So, Jeny has 1 meter length more than Jony.

2. A bottle is 3 inches in length. If another bottle of 2 inches is placed besides that bottle, what will be the deifference of their height?

3. Ron's height is 5 feet. Drake is 5 feet 3 inches in height. What is the difference in height between Ron and Drake?

4. Jane has a stick which is 10 meters long. If she takes another stick of 6 meters length, what will be the difference of length between the sticks?
