

Solve 3D Shape Riddles

Here are some riddles on the worksheet. Can you solve and draw the correct shapes?

Ques 13- hints :

With five sides around my face, I'm not a cube, but find your place. What am I, a shape so bold, in pyramids, my story's told?

Ques 14 - hints :

Faces and edges, I have a few, a prism, but not just for you. What am I, with hexagonal grace, shape that stands with a solid base?

Ques 15 - hints :

I'm like a cube, but not as square, equal faces, it's only fair. What am I, a shape so neat, in packages, you might meet?

Ques 16 - hints :

I have no vertices, but a surface so smooth, with no flat faces, I'm on the move. What am I, a shape so round, a ball-like form that can astound?

Ques 17 - hints :

I have six faces, all sides are the same, a perfect cube, what's my name?

Ques 18 - hints :

No corners or edges, just curves you see, round and smooth, what could I be?
