

Drawing 2D Shapes Riddle Worksheet

Here are some 2D shapes riddles on the worksheet. Can you solve riddles and draw 2D shapes?

1. I have four equal sides, all straight and neat, corners four, where lines do meet. A shape so simple, in every class, what am I?

Answer: 

2. I'm like a box but not so tall, with opposite sides that never fall. Squares love me, for I'm a mate, which 2D shape am I, can you relate?

Answer: _____

3. I'm like a pizza, a perfect round, no corners here, just curves I've found. Draw me carefully, with a steady hand. What's the name of this circular band?

Answer: _____

4. Three sides I boast, no more, no less. In geometry class, I'm a success. My angles sum to 180. Can you guess which shape I am for you?

Answer: _____

5. I have five sides, each one the same, regular star, not seeking fame. Count my points and join the dots. What's my name, do you have thoughts?

Answer: _____

6. No corners here, just one curved line, a loop, a swirl, a shape so fine. What's my name?

Answer: _____
