

## Subtraction

### Word Problems with Pictures

1) There are 6 cars parked in a parking zone. 2 cars drive away. How many cars are left in the parking zone?

$$\underline{\quad\quad} - \underline{\quad\quad} = \underline{\quad\quad}$$

2) There are 10 stars shining in the night sky. 4 stars disappear behind clouds. How many stars are still visible in the sky?

$$\underline{\quad\quad} - \underline{\quad\quad} = \underline{\quad\quad}$$

3) 7 puppies are playing in the yard. 2 puppies go to sleep. How many puppies are still playing in the yard?

$$\underline{\quad\quad} - \underline{\quad\quad} = \underline{\quad\quad}$$

4) Jacob had 8 books on a shelf. 5 books are borrowed from the library. How many books are left on the shelf?

$$\underline{\quad\quad} - \underline{\quad\quad} = \underline{\quad\quad}$$
