

Counting Back to Solve Subtraction Equations

Directions: Count back from one number to another number to solve the subtraction equations.

1) I can count back 11 from 15

15, _____

$$15 - 11 = \underline{\quad}$$

4) I can count back 8 from 13

13, _____

$$13 - 8 = \underline{\quad}$$

2) I can count back 6 from 18

18, _____

$$18 - 6 = \underline{\quad}$$

5) I can count back 7 from 11

11, _____

$$11 - 7 = \underline{\quad}$$

3) I can count back 8 from 16

16, _____

$$16 - 8 = \underline{\quad}$$

6) I can count back 2 from 13

13, _____

$$13 - 2 = \underline{\quad}$$
