

Counting Back to Solve Subtraction Equations

Directions: Count back from one number to another number to solve the subtraction equations.

1) I can count back 6 from 14

14, _____, _____, _____, _____, _____, _____

$$14 - 6 = \underline{\quad}$$

4) I can count back 4 from 19

19, _____, _____, _____, _____

$$19 - 4 = \underline{\quad}$$

2) I can count back 7 from 18

18, _____, _____, _____, _____, _____, _____, _____

$$18 - 7 = \underline{\quad}$$

5) I can count back 5 from 15

15, _____, _____, _____, _____, _____

$$15 - 5 = \underline{\quad}$$

3) I can count back 1 from 13

13, _____

$$13 - 1 = \underline{\quad}$$

6) I can count back 8 from 10

10, _____, _____, _____, _____, _____, _____, _____

_____, _____

$$10 - 8 = \underline{\quad}$$
